Maths and Civics collide”*

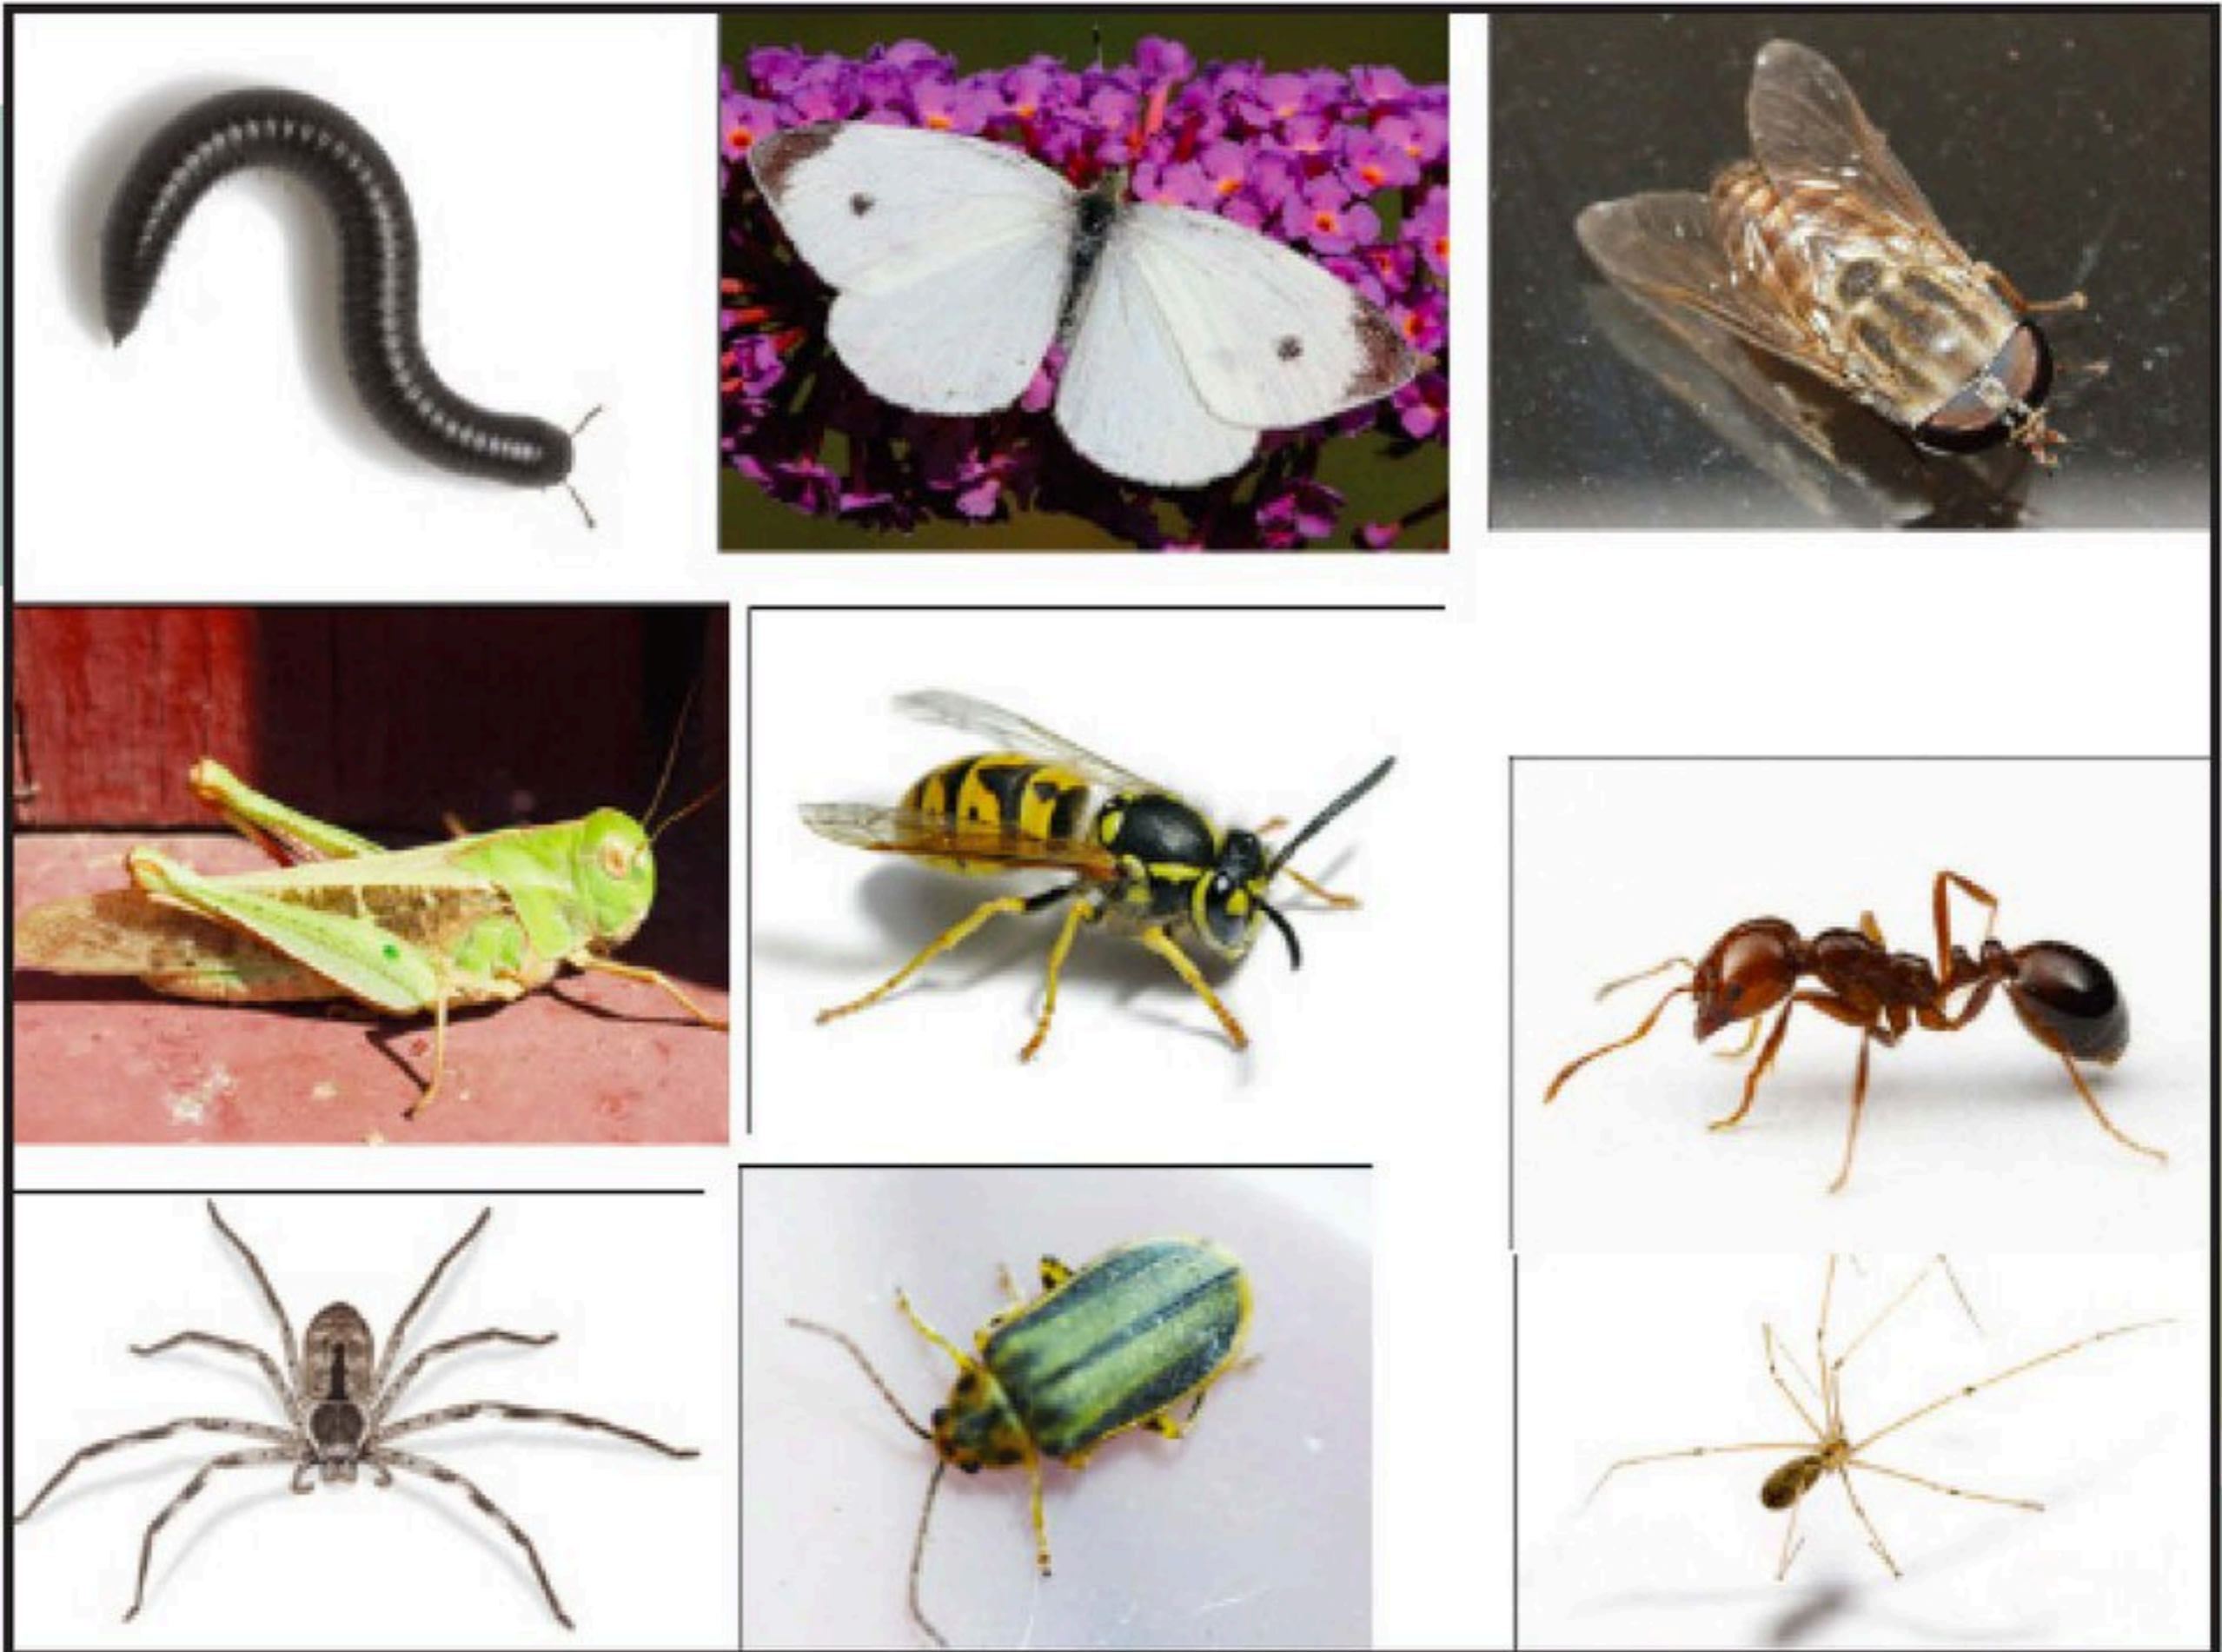

BUG THINKING - Process of Elimination

Eliminate three out of the nine arthropods (bugs) that are pictured below. Consider your choices and provide reasons for why you chose to eliminate the bugs you did.

Strategies: RESEARCH, ASK A FRIEND, ASK YOUR PARENT’S OPINION

Just what are the bugs you are choosing from? What roles do the bugs play in ecosystems? Are they native or introduced bugs? Which of the arthropods pictured are dangerous in real life? Do any of the bugs have a negative impact on agriculture/farms? Do any of the bugs have a negative impact on native creatures?

*Good luck. You can ask questions via Bug Blitz Trust on our Facebook page.
Please share some of your reponses with us via Facebook*
